

Resizing Digital Images in Corel Paintshop Pro

Open your images in PSP. On the menu it is **Image > Resize** or simply by the shortcut **Control-S**:

This brings up the resize dialogue. For the club competitions, the projector has the resolution of a HD TV screen, 1920 pixels wide and 1080 pixels high. You need to resize your image to fit within these limitation. In this example, it is limited by the 1080 pixel vertical dimension. (Most images except panoramas fit in this category.)

Click OK.

Now use **Save As** to save a copy for upload into your competition.
